

CAR-LOT BEANS NEXT MONTH IF STORM MISSES

Favorable Growing Conditions
Got Under Way

PUMPS MOVING WATER,
NO OVERFLOWED LAND

Good Yields Expected From
All Fall Crops; Ac-
rage Reduced

Shipments of beans in car lots will be made from the upper Everglades in October. This was the outlook Tuesday, while the weather station was uncertain.

Showers and high temperatures have been favorable to the growth of beans. Time has been lost to the extent of a week by the disruption of work occasioned by the threats of a severe storm. This affects the acreage of the fall bean crop in this region.

When and in what quantities beans will be shipped in the event of a storm depends on the severity of the storm; the acreage and distribution of the fields is such that some of the fields are likely to "get under" another condition.

Pumps in the drainage districts are being run day and night and there has not been heavy rainfall, all of the water is that is farmed under normal conditions. Lake level is below bottom land; it is not hard to get the business community, however, or the low lands are merely reserve for use in the spring water levels are low.

Although rains of more than an inch fell at Canal Point, Port Mayaca and Indiantown, some spots north of Canal Point were missed and trucks in that locality report that their ground is a bit dry.

In other years it has been necessary to irrigate seed beds, and there have been losses of seed because of the years, but this year the showers have been such as to promote the growth of seeds in beds for transplanting.

PROTEST BRIDGE CLOSING.
Protest made by Edmond O'Singer on behalf of the Martin County Chamber of Commerce, is credited with preventing the closing of Kissimmee river to navigation on the application of the Seaboard Air Line railroad, which wanted to be relieved of the cost of a bridge at Fort Lauderdale.

REMOVING DRIDGES.
Captain Rick is over from Clewiston to move a sugar company dredge out of a slip where it will be made by the dredge that is raising the canal bank. The dredge will be returned to Clewiston. The Holloway & Duffins dredge that was in the slip has been pulled out and left in the canal so the dredge can go ahead.

BRABHAM FOR BRIGHTON.
A carload of young Brabham bulls, apparently about two years of age, were received at Okeechobee from Texas, where J. H. Bright went to purchase them about a month ago. They arrived on the road nine days and arrived in fine condition. They presented a most unusual and attractive sight as they were being driven down state road No. 8 to Brighton, the Okeechobee News says.

BROWARD PACKING HOUSES.
Representatives of the Florida East Coast railway were in Fort Lauderdale discussing with growers the erection of new packing a fill will be made by the dredge that is raising the canal bank. The dredge will be returned to Clewiston. The Holloway & Duffins dredge that was in the slip has been pulled out and left in the canal so the dredge can go ahead.

LET'S STOP THE NONSENSE AND TAKE UP THE JOB

Some excellent reasons existed the first of the current week why Congress, which is now in session, should take up the matter of flood control in the watershed of Kissimmee river and Lake Okeechobee, and the validity and urgency of the reasons have been made stronger by events later in the week.

The events to which reference is made were the reports of an approaching hurricane and the exodus of people from the communities on the shores of Lake Okeechobee.

Thousands of persons fled from their homes and their farms and abandoned their property because they feared that if they stayed near water from the lake, which was raised by deposits from Kissimmee river, would be blown over the banks of the lake and they would be drowned. The people who fled acted on information from an agency of the Federal government, the Weather Bureau, which, whether accurate or not, at least was official information.

This cannot go on.

There is an absurd state of affairs in Florida, and it needs only that the facts be widely known to change it. One fact in the series is that which is stated above. There are other facts.

An outstanding fact is that the Republican national organization urged the voters of this state to vote for Herbert Hoover for president as against Albert E. Smith because if Mr. Smith were elected, the Republican party would in Congress provide appropriations for flood control and other purposes. This would offer was accepted and the state did go Republican.

When it is remarked that millions have been allowed for eradication of the Mediterranean fruit fly, that fails on in different cases in the Everglades, for there is no fruit fly here and no more menace to us than to Cuba or Mexico, our competitors, or to any state of the nation. Any reference to appropriations for fruit fly eradication is merely an effort to sidetrack discussion of the one point the people in the Everglades are interested in, and that is flood control.

Opinion has already been recorded in this newspaper that the Florida Flood Control Association is devoting more effort to justify its continued existence as a salary-paying organization and a political tool than as an agency for the purpose for which it was organized.

The Everglades Flood Control District board will be in the same category if it doesn't perform. On that board are five state officials, and in the past the men in those positions strove strenuously to retain position on the commission Everglades Drainage District board. These men wanted the positions they held, they sought the positions, they retain them, and it is their duty to discharge the responsibilities of the position even at the sacrifice of their convenience.

Recently the discharge of duties of members of the Everglades and Flood Control boards has been delayed or prevented, it is said from Tallahassee, because the board members had to stay in Tallahassee and the explanation of their failure to get into the Everglades and learn conditions means nothing more than that these men are holding more jobs than is right. It discloses the condition to which attention has been called before, that state officials make Everglades affairs subordinate to other affairs.

Another fact in the series is the factional fight in the Republican party of the state, the fight between two groups for control of patronage and influence with the national administration. Everglades people want to deal with the persons in this Republican organization who have influence with the national administration, and the commissioners of Okeechobee Flood Control Association do not know who to deal with—or have to double their work by dealing with two sets of bosses and become involved in arguments that have nothing to do with flood control. This we say is an absurd and discreditable state of affairs. It ought to be ended.

WANT PHONE LINE TO PORT MAYACA

Probable Extension May Depend on What Is Done
As To Power Line

Communication facilities for Port Mayaca by telephone or telegraph during the shipping season is expected by Paul M. Hoenel, manager at that place of the Mayaca Company which will have in 1930 acres of truck crops. Port Mayaca, nine miles north of Canal Point, is located on Lake Okeechobee at St. Lucie canal and has a station of the Florida East Coast railroad.

Negotiations for extension of the Florida Power & Light Company's power line from Clewiston to Port Mayaca are still pending. Joe H. Gill, vice president of the power company, is away on business, and as John C. Phillips, head of the Mayaca Company, is expected in Miami in October, the negotiations are halted awaiting a meeting between them next month.

The providing of telephone service to Port Mayaca may be brought about if the power line is extended, for it is understood the telephone company has an agreement under which it can use the poles of the electric company on a rental basis. Extension of the power line and the telephone line to Port Mayaca

GOVERNOR COMES TO JOIN TOUR OF DRAINAGE BOARD

At West Palm Beach This Morning At 8 o'clock Awaits Associates

INVITED TO LUNCH
WITH PAHOKEE CLUB

Chief Drainage Engineer F. C. Elliot Is Courier In Advance of Party

Governor Doyle E. Carlton will be in West Palm Beach at 8 o'clock this (Friday) morning and he wanted the members of the Everglades Drainage District board to meet him there.

Chief Engineer, said yesterday afternoon in a telephone conversation.

Mr. Elliot was in West Palm Beach and his conversation was with Marshall Lair, who received the message on behalf of his father, Dr. W. H. Lair of Pahokee, a member of the drainage district board. Mr. Elliot was understood to say that Governor Carlton was in Miami at the time of the conversation.

Because of the threatening weather it was thought not unlikely that the visit of the governor, chairman of the board, would be postponed.

An invitation to Governor Carlton and his party has been extended to have lunch today with the Pahokee Business Men's Luncheon Club.

AS FIRST ANNOUNCED
The literary as first announced was this given last week in William Griffin's paper, The Okeechobee News.

Drainage Commissioner C. E. Simmons received notification from Tallahassee yesterday that the commissioners of Everglades drainage district, including Governor Carlton, will arrive in Okeechobee on next Thursday afternoon. The commissioners are on an observation tour of the district, beginning at Miami and will end at Port Myers on the 28th. The itinerary of the tour is as follows: Miami at 8 a. m. from the McCallister Hotel, going to Stuart and down the canal to Port Myers, and from there to Okeechobee. The next day they will visit Moore Haven, Clewiston, LaBelle, Port Myers and Everglades, disbanding the morning of the 29th at Ft. Pierce.

A fish fry will be tendered the commissioners on the afternoon of the 29th at the Okeechobee at the waterworks plant. The Governor will be the house guest of Mr. and Mrs. E. C. Simmons and the other commissioners will go to the homes of the local hosts for the night, yet to be selected. Arrangements for their entertainment will be undertaken by the American Legion and the Business Men's Club.

Loans For Seed

Washington, D. C., Sept. 26. I feel that the people of Palm Beach county will be interested to learn that I have today received a communication from the Department of Agriculture which reads as follows:

"In further reference to your representations regarding Palm Beach county, we have notified Mr. Mounts, the county agricultural agent, that the amount originally allotted to the county for loans to farmers for purchase of seed and fertilizer, fifty thousand dollars, may be extended to the county early as possible for the growers' needs." I am so glad to have been able to assist the farmers of Palm Beach county in their need for seed and fertilizer, and I am sure that my cooperation as possible.

FARMING SCHOOL OPENS UNDER ITS GOOD CONDITIONS

More Equipment For Canal Point Agricultural Vocational School

PRINCIPAL REVIEWS
FACULTY, SCHEDULES

Corps of Capable Teachers In All of the Several Departments

In spite of handicaps the Canal Point Agricultural High School opens this year under more favorable conditions than in any previous season.

Courses in Latin and economics were introduced this year. Prof. Bishop has had in addition the opportunities of the students to vary the course and increase its civic content.

Considerable new equipment has been procured and is being installed.

The teachers with the exception of three are housed in the comfortable teacherage, with Mrs. M. L. Johnson as matron in charge.

The faculty of the Canal Point high school is under the direction of Prof. E. E. Bishop, B. S. of the Middle Tennessee Teachers' College and of Murphersboro, Tennessee, with graduate work in high school administration at George Peabody College for Teachers at Nashville, Tenn.

Prof. Bishop has had in addition to his literary course thorough training in agriculture and in his former positions has proved himself a successful leader of the school. He comes from the faculty of Delray Beach where he taught history and served as physical director.

Prof. H. L. Speer, M. C. in Agriculture, U. of F., conducts the agricultural departments at Canal Point, Pahokee and South Bay, with headquarters at Canal Point. Before coming here he served as instructor in the science department of the University of Florida. Hitherto, Prof. Speer has served as principal and the Smith-Hughes director.

This year the Smith-Hughes work will engage all his attention.

Prof. J. B. Cox, B. S. E., U. of F., principal at Port Myers Junior High in 1927, Delray Beach elementary school 1928 is now head of junior high science and high school history at Canal Point.

Mr. H. J. Chaffar, A. B. E., U. of F., instructor in mathematics at Gainesville high school 1927 and mathematics and Latin at Pasco high 1928, offers high school mathematics and Latin. He is a native of Florida.

Miss Mary Young, Womans College, Valdosta, Ga., has the science department for her second season here. She has had additional training for her work at the University of Georgia. She serves also as physical director of the girls, and takes care of the health program.

Mrs. L. C. Goolsby, A. B. of Florida State College and former resident of Gainesville, has joined the English department.

Mrs. Wm. P. Jernigan, Jr., A. B., Florida State College, has had extensive experience in the work in which she is now engaged. She serves here in the primary department.

Miss Mary Higgins of Melbourne, L. I. Florida State

If These Are Wrong What Are Yours?

May be these figures are not right, but if they are wrong it will give a smarter man a reason for giving the correct figures:

Lake Okeechobee was at elevation 13.4 on a given date and six days later is was recorded as being at elevation 13.8.

This indicated that a layer of water four tenths of a foot deep (or thick) had been imposed on the water already in the lake. That much water got into the lake in six days. How long would it take to get out?

A Canal Point resident figured that the layer of water four tenths of a foot deep was equal to 11,000,000 acres-inches of water. If St. Lucie canal was discharging at the rate of 4,500 feet per second, it would take the canal 29 days to get rid of the amount of water that was added to the lake's contents in six days.

FREE RIDES FOR ALL WHO WANTED

Red Cross and Railway Co. Provide Transportation—One Way Only

Many negroes and some white persons left Canal Point early Thursday morning on the Florida East Coast's regular north bound train on passes written on behalf of the Red Cross by E. G. Kilpatrick of Pahokee and H. L. Speer of Canal Point.

The orders for transportation were written on authority from an official of the national Red Cross in West Palm Beach.

The tickets were to Okeechobee and for one way only and were issued to no other persons than those who said they were without funds with which to pay for transportation.

4 MEN STAY ON KRAEMER ISLAND

Of the population of Big Kraemer island in Lake Okeechobee, four men elected to stay there; all of the others having left, having come out on John Fultz' mail boat.

The men who remain on Kraemer are V. H. Waggoner, a home-staying pioneer, and a man and two sons who moved to Kraemer recently from Palmetto.

Eight persons on Little Kraemer and Torry islands went out by way of Belle Glade.

Ritta island is so near the mainland on the west side that no apprehension is felt for the safety of any persons who may remain in Ritta, as water will not come on it if the wind is from the northwest.

College, with experience as a teacher in the demonstration school, has the second grade.

Miss Eva Holt of Fort Meade has the third grade. She taught at Bunnell last year and has had her training at the summer school of the University of Florida.

Miss Adelaide Muller, of Oxford, Fla., L. I. Florida State College, has the fifth grade. She has had extensive experience and special training at the University of Florida. Last year she taught at Benson Springs in Volusia county.

Mrs. M. L. Johnson of Meriden, Conn., and University of Florida summer school has had extensive experience in both administrative and teaching in elementary schools.

She will conduct the second, third and fourth grades. The past three years she has taught in the Mount Dora schools. WCB:pmScv Rgn mL ebb

REFUGEES RETURNING AFTER FLIGHT IN FEAR OF LAKE OVERFLOWING

Almost Total Suspension of Business Until Word At Midnight That Hurricane Had Broken Up

Everglades people who fled Wednesday in fear of the lake being driven out of its banks by hurricane winds are returning today, all danger of storm and overflow being past.

Said in the language of the Everglades, "Folks were leaving out" Wednesday afternoon. A bit more than 300 through tickets were sold at the Conners highway north toll gate Wednesday afternoon between 1:30 and 4:30 o'clock; dozens of cars had gone through each hour during the forenoon and there had been departures through the south gate and on the Belle Glade road. In Canal Point it looked as if a Wednesday half-holiday had been substituted for the usual Thursday's half-holiday.

What took place in Canal Point was similar to what took place in Pahokee, Belle Glade and South Bay, according to reports from these places.

Many of the persons who went through the north gate at Canal Point Wednesday, fleeing from a threatened hurricane, were from Pahokee and the south end of the lake.

Of wind there was little fear; the exodus was due to fear of "what the lake might do."

There was no hysteria on the part of the exodus; rather, the mood was of a picnic party. No one expected to be away long; all were determined to return as soon as the storm passed.

L. Phillips Clarke and F. D. Morrish of West Palm Beach, acting for the county Red Cross, made a tour yesterday morning of all of the upper Everglades communities to confer with local Red Cross committees and check up on the preparations made to deal with a disaster if there was a disaster.

The Everglades News kept open house Wednesday night with all the information the Miami stations had.

Both Miami stations broadcasted by the WIOD on a half-hour schedule.

The county Red Cross and the county American Legion, enlisting the services of citizens generally, had perfected complete organization to deal with every contingency.

Evidently the Red Cross chapter at Okeechobee was taking care of refugees from the Everglades. Hon. P. Tompkins telephoned yesterday afternoon to Marshall Fair at Pahokee asking if any more refugees were to be sent there.

THE DECEITFUL WEATHER BUREAU

The space available at the moment does not allow full discussion of the adequacy of the U. S. Weather Bureau's handling of hurricane news, but as this article is intended to incite comment, what is not said can be said in reply to such criticisms of this article as may be made by persons who think the statements inaccurate or the conclusions unjust.

It is not likely that south Florida is visited by hurricane more frequently now than in other decades or that the hurricane winds are of greater duration or velocity. The change is that there is far larger population and more interests.

With more desire to be accurate and fair than to be critical, it does seem to the Everglades News that the U. S. Weather Bureau's staff and methods have not been changed and improved in proportion to the increase in population and interests.

It will not do for the Weather Bureau to say that its warnings and other bulletins were distributed earlier and more frequently than in the past, for although it is true that there was early and frequent distribution, this distribution was by private agencies, not governmental.

The question is the Weather Bureau's organization for getting information and making sound conclusions from its data; that is the business of the Weather Bureau—other agencies will take care of the rest of it.

Has the U. S. Weather Bureau a station in Cuba or elsewhere in this section? We ask to learn. Has it a satisfactory arrangement for exchange of information with the Cuban and British weather bureaus and with privately owned radio companies?

The United States has coaling stations all over the world for the navy. The navy has complete is the collection and exchange information from those points? We suspect that the Navy Department gets larger appropriations than the Department of Agriculture and has a better organization for every purpose.

The Weather Bureau is under control of the Department of Agriculture, and the Department of Agriculture is in politics up to its neck. This entanglement in politics may not involve the Weather Bureau directly, but we suspect that it does handicap it indirectly.

There is too much argument in the Department of Agriculture about forms of "farm relief" and not enough accomplishment in the lines to which the Department should be devoted.

The United States government is the greatest institution in the world, and for it to create a situation under which its citizens scurry around like ants disturbed by a housewife with a kettle of hot water is ridiculous. If this government could get information about the location and character of a hurricane one hundred miles away, the department in charge of that work is very poorly managed.

COUNTIES MUST BUY ROAD

The Okalochee News.

Okalochee, Martin and Palm Beach counties may have to pay or lease the Conners Highway. There is little hope that the state will ever free this road of tolls, and until it is a free road the toll charges on it smother and holds back the development of one of the best sections on Lake Okalochee.

YES, WE SAW THE ARTICLE

J. H. Benjamin is an old-time Florida newspaper man. He was an editorial writer on a newspaper in Central Florida for several years, and when Joe L. Earman started The Independent at West Palm Beach he got "Ben" to come down and work for him.

The Independent suspended publication recently. There appeared in the editorial column of the Tallahassee Democrat last week an article captioned "Another Attempt to Remove the State of Florida from the Union."

A copy of the Tallahassee Democrat with the Benjamin article read here in the Everglades and has been read here.

BUT WHAT IF THE JUICE GOES "WET"?

The Women's Christian Temperance Union is reported to have been active in the removal of the Wisconsin prohibition enforcement, Mrs. Ella A. Wood of Brooklyn, president of the W. C. T. U. in New York, is reported to have been the first prohibitionist to appear in Indianapolis at the 50th annual convention.

Mrs. Wood's proposal of popularizing fruit juices as a beverage, consisted of a resolution of the World's W. C. T. U. The world has used fruit juice as a beverage for a long time and will keep on doing it, unless the drink is taken. Detail more

THE EVERGLADES NEWS, CANAL POINT, FLORIDA

AN EXCITING ONTEST

Returns from a precinct in the Bahamas Islands at 11:30 Thursday night, with returns from the precinct. The contest was lost, and its defeat was officially concluded in telegrams from Washington.

Some of the supporters of the hurricane were reluctant to concede defeat, however, and are holding out, refusing to haul down their flag.

At the hour Friday morning there is a disposition to ask for a recount or to demand the calling of another election, rather than to go back to work at the duty duties. The failure of the Red Cross to intervene more actively is resented.

Sentiment is strong among both parties, however, for a constitutional convention to limit hurricane seasons to one every four years instead of the campaigns disturbing business every year right on the eye of the tourist season and the bean shipping season.

TOO MUCH LOAMING

The Homestead Leader. There is too much loafing in Homestead. We have too many drug store cowboys and too many barber shop apothecaries. They drive away the business that they want. It has been so bad at times that barbers have had to stand outside the doors of their shops to let waiting customers realize that the man inside is not waiting to be "next" in the chair.

The habitual loafer is an undesirable citizen in any community. He is harmless and amiable but simply clutters up the landscape and causes needless congestion in drug stores, soda fountains and pool rooms. The loafer is a nuisance to the respect and honor the community shows its more industrious citizens, he becomes a scandal among those who can be said to have any sense at all.

WHAT COULD THE POOR GIRL DO?

Here is a 250-page novel and a six-reel movie picture condensed into a three-paragraph news report from the Hendry County News. It has in it all the drama of a novel and the excitement of a hero. Read it.

Louise Stallins was eighteen years old lived with the family of her sister, Mrs. T. K. Ker. The report given the News was that she shot herself with a 410 gauge gun with suicidal intent.

Keri, the scene of the tragedy is on the A. C. Railroad. Hendry county smiles from Florida. The population includes the owner of a logging camp Mr. Weatherly and family, the station agent and the Central family. Negro shacks where the logging camp negro laborers live are the only exception to the three white men and their families. Mrs. Weatherly stated that the deceased Louise Stallins had visited her the day of the tragedy and left her house apparently in good spirits. Mr. Cogswell, a member of the family, said that Louise was a girl who went for work and as it was unsuccessful and without money she said, "If it was not a 410 gauge gun, I would have shot myself with a .38 Smith & Wesson. The girl was seen examining the gun and one of the family said, "Louise is loading the gun." Still no one intentionally or thought to molest her. About a half a minute later and found her lying on her bed with the bullet wound through her body that caused her death.

HEALTH AND VEGETABLES

The Tampa Daily Times.

Indice is the best modern medicine in cases of gutters. South Carolina found out that her vegetable gardens contained considerable lead and profitably considered that knowledge. Coming in to information of this, Florida's vegetable growers have been assured that they do, some of them in considerably larger quantities than South Carolina.

"That is all right. The only criticism to be made is that it was not much later than we should have been beginning so."

The Times distinctly states that several years ago, in 1925, if we mistake not—Dr. Charles B. Northern of Ocala, published several articles declaring that Florida fruits and vegetables were health values unapproached by those of any other state. He argued the question forcefully, scientifically and convincingly. Without going back to the files of those days, we are reasonably sure that he spoke of the effect of the salt, salt air and sunshine, and we have the reflection that he spoke specifically of indolence. Should there be mistake as to this, however, he did emphatically assert the health value of Florida soil products because of the fact that the nation with the most take an extensive advertising campaign for the purpose of acquiring the nation with the most take in legal phraseology, he made out a case. But we were too busy then laying out farm lands into subdivisions, digging all sorts of trading in real estate—some of it wise and some of it unprofitable; getting rich on paper and losing it on reality; and turning to such homely things as soil products and health from them. We thought we are to become Florida and Florida is to become a health resort by digging in the soil. So we pursued our hectic course and let South Carolina best by the pursuit of a less spectacular and more profitable course.

The matter at issue is one concerning which we should consider wide awake. No more promising field spreads before us than the one of ascertaining the health values of all our fruits and vegetables and then proceeding to tell the world about them. Being always careful to give the exact facts, that is this something worthy of doing has been established by W. J. Hovey, who has clearly established the fact that grapefruit produced in the Hovey section poses unusual virtue in cases of diabetes and kidney ailments because of the soil.

It would seem that what now needs to be done is to have Dr. Charles B. Northern tell us again and in the light of the advantages produced by Florida fruits and vegetables and why those advantages are possessed, again, having checked the representations of his friend, then well established, then pricing to regret the exact information far and wide.

It is matter for regret that not more attention was paid to what Doctor Northern said when he said it—had there been North Carolina might now be far ahead of us in re-vegetables and health. That, though, is another case of spoiled milk. We can, at least, approach this matter earnestly and considerably now. And we should. It appears that every cause assigned for

SAFETY DEPOSIT BOXES

It will cost you little to keep valuables in a safety deposit box, to which you will have the only key.

For the small cost of a box, no one can afford to be without the protection afforded, and the loss through accident or carelessness of one item would pay many years' rental on a box where nothing can happen to your important papers and securities.

Bank of Canal Point

Canal Point, Florida

CANAL POINT

Rev. W. J. Thomas went to safety harbor the latter part of last week to bring Mrs. Thomas and the boys home but it was concluded that she will stay there a while longer. They have rented their apartment to Mr. and Mrs. Shaw. Mr. Shaw is trucker for the Powers company.

Mr. and Mrs. W. A. Adams went to Tampa Tuesday, returning Monday. On the going trip they encountered heavy rains as they approached Tampa and as the same back they found places washed out so detours were necessary. Mrs. Adams died upon the way. Mrs. Adams was taken to the hospital where she died.

Mr. and Mrs. Henry Barwick again are residents of Canal Point and will be here during the vegetable shipping season, occupying the house on the lake front where they lived last winter. He continues to represent J. H. Brothers, produce commission firm of New York. During the summer he was at the producing points in Georgia and elsewhere from which shipments of vegetables were being made to his firm. Mr. Barwick takes an active and helpful interest in community affairs and his wife in social affairs and their return is welcomed by their friends.

Fred Reynolds, who has a home and a farm north of town, has returned from Rockport, Texas, where he spent a vacation with his father, A. B. Reynolds. Between fishing trips and excursions to points of interest he did a little plain and fancy painting just to keep his hand in. The elder Mr.

Reynolds bought the ridge lot and a farm tract on the lake front many years ago and was at the point of abandoning the property and letting it return to the state for taxes when his son Fred took it over. Fred has had the land cleared and is putting the place in good shape.

Tom Adams, the railroad bridge tender at Jacksonville, is a skilled worker in wood, and he is specializing in the making of tops for automobiles and bodies for trucks. His customers have found that for a relatively small expenditure they can have him do work which will increase the value of their car or truck far beyond the cost of the work. Adams does.

W. G. Todd, the county bridge tender, is in the sanitarium at Madison, Fla., taking electrical treatment. He has been there for two weeks and is not expected home for two weeks or so yet.

The Meads of the Pahokee Plumbing Company are completing the installation of plumbing in houses at Everglades experiment station below Belle Glade.

Old Bob and one of his assistants spent several days this week at the south end of the lake. One of the jobs was the installation of a large Delco plant at the Hector Supply Company's warehouse on the chosen side of Hillsboro canal at Belle Glade and the other job was at the experiment station.

Boys Winne, state stock inspector for the live stock board, discovered that two horses had been brought in without being dipped under the tick eradication rules and he sent the horses back.

Boys Winne is putting up a small house on his Torrey Island farm.

THIS IS THE STORE

COMMUNITY GOSSIP

A man's wife was sick—she had been sick a good while. A neighbor asked the husband how his wife was getting along, and the husband said: "She's about the same, and I do wish she'd get well—or do something." That's the way we felt about the hurricane, as news dribbled in that didn't tell anything. We wished the hurricane would get well or die, and have it done with.

A man who reads the Bible a good deal advises that the chapter of Genesis which deals with the flood be read at this time of year. He says no one need be afraid that the whole world will be flooded even if a great deal of rain does fall, for the promise is given: "I will not again curse the ground any more for man's sake, for the imagination of a man's heart is evil from his youth; neither will I again smite any creature every thing living, as I have done." And this man who reads the Bible a good deal says that after the flood Noah made a vineyard and grew grapes and made wine and sent drunks off of the wine, and if he (this Canal Point man) gets some cane and makes some rum after the 1939 flood, he thinks he has justification.

One fellow said: "I don't care if there is a hurricane; it will give me an excuse for not paying my bills."

When Ralph Stallion went away on a summer vacation, R. M. Baker at the newstand told him to look back before the hurricane and Ralph did.

What does a truck driver for a lumber yard in the upper Everglades have to do in the course of a day? This is part of what one of them did on the second day of the week common school Monday: Took a load of lumber down the canal to the Powers job, took lumber to a job in Pahokee's business district and made a delivery to Port Mayaca. The Powers job is one of the pump houses for a drainage district. This little instance of a day's experience shows that the area is busy in which advancement is being made.

Things happen at night, too. In the hours of Sunday two men tried to steal a couple of Jack Pope's chickens. The men were brought in when some one yelled at them they dropped the chickens and ran.

A deputy sheriff, looking for contraband liquor Saturday night, found it in a room in which prayers were being said.

RAINFALL NOT HEAVY

There was not as much as an inch of rain in any day of the four days of the equinoctial storm period at pump station No. 3, six miles down the canal from Canal Point. At that point on Friday the rainfall was fifty-one hundredths, on Saturday fifty-nine hundredths, on Sunday forty-four and on Monday fifty-one hundredths.

Lecturer Simonsen records show the rainfall at location 115 feet Monday when the canal started running into the lake.

CALLERS

W. W. C. Simonsen came along with him when J. B. McDonald of Stuart visited Canal Point and Pahokee Sunday. They think the time is not far distant when the Seaboard railroad will build into this section from Indiantown.

W. L. McGriff, manager of Conners Highway, passed here Tuesday, on his way to West Palm Beach.

Dr. Emory J. Thomas of West Palm Beach is getting up at 5 o'clock each morning to drive out to Canal Point and look after the construction of a building at Conners highway and the lake front.

M. E. CHURCH NOTES

Sunday school, 9:45 a.m. Preaching services, 11 a.m. and 8 p.m.

The Ladies Aid met with Mrs. Bergen Tuesday afternoon. The missionary committee had charge of the program. Mr. Filly opened the meeting with prayer followed by a few remarks of encouragement and commendation for the splendid work done by the Aid during the year. World service was the subject for discussion. Four new members joined at this meeting. Mrs. Ralton, chairman of the ladies committee, gave out a number of articles to be made and embroidered.

The next meeting will be with Mrs. James Oct. 7 at 2 p.m. Messrs. Kline and Noble from Jacksonville and Mr. Forrest and his sister of Lake Worth were luncheon guests at the parsonage Thursday.

SECURITY FELT AT CANAL POINT

Residents Depend on Elevation of Ridge To Give Protection

The elevation of the railroad grade at Canal Point is 26 feet above sea level; the ground elevation north of Canal Point is high, and most of the residents of the country north of Canal Point have lived there for years and have seen storms with strong winds from the northwest and none of the storms have ever brought water to the "ridge." In consequence of this there were few departures of persons who live north of Canal Point.

Several places of business in Canal Point keep regular hours. The Gaston store in the Pope building on North Conners highway, the pool hall, Bob's garage and The Everglades News—among them, although some of them with reduced forces.

Schools were dismissed Wednesday afternoon because the departure of families depleted the classes to the point that adherence to class schedule was impossible.

Southern Sugar Company forces pulled some of its tractors out of low and wet places Wednesday as a matter of precaution but the white employees remained, at their posts in all departments.

The bank of Canal Point opened at the usual hour Thursday and transacted business as usual. Some checks were cashed in the course of business and three deposits had been received up to noon, although most of the places of business were closed. Ten of the deposits were made as a means of security of purity that the owners thought might get lost if there was high water or high wind.

Rev. Paul C. Filly, pastor of the M. E. church, and his wife, an officer of the Red Cross, remained at their posts. He has a barometer and as he is an old sailor, familiar with the use of the barometer, his judgment was relied upon that there was no danger here up to this time.

Several families took refuge in the Canal Point school house Wednesday night.

GOVERNOR NOTES AND PHRASES FROM PRODUCT This letter from Governor Carlton to the Okeechobee News is printed in the current issue of that paper.

"The people of your community are to be commended for the splendid spirit of agricultural enterprise being shown."

"It has come to my attention through your good paper that two corn crops per year are to be raised there and as a result corn piled on the northern markets during the winter season when it has little or no competition and will command a high price."

BEANS, PEAS, ONION SETS, CABBAGE, TURNIPS, OATS, RYE For immediate shipment. All reasonable Field and Vegetable Seeds. Write for Price List. Write to us today for special price on your seed requirements. Our complete stock will enable us to supply you to advantage in price and quality.

OKEECHOBEE

From The News, Sept. 20. H. T. Bass, Jr. left Tuesday morning for Stetson University. Carl Duranville will enter the University of Florida this year.

J. E. Jennings left Tuesday for St. Augustine, to enter the Florida school for D. D.

Mrs. Earl Swain of Canal Point has been visiting her mother-in-law, Mrs. Walter McGriff.

Ray Raulerson left last week for Deland, where he has entered Stetson University.

Kerr & Lawrence completed their paving contract on the Panama Trail in Lee county Saturday.

Miss Marie McDermott left Tuesday for Tallahassee where she will enter her third year in the Florida State College for Women.

Charlie Raulerson and Turner McDermott left Sunday for the University of Florida. They moved through with Hiram Raulerson who returned Tuesday.

Elmer Bass of Kenansville was in the city Monday. He had been no preparations for work and he has been in the hospital for some time.

Mr. and Mrs. Walter McGriff enjoyed the week end visit of friends from Miami, Mr. and Mrs. Eugene Moore and Mr. and Mrs. J. J. Casey, a former resident of our city, was here Monday. He expects to move his family to Georgia from Kenansville, where they have been for more than a year.

WHAT PEOPLE SAY

W. P. Jernigan, of Canal Point: "I wish the hurricane would make up its mind what it's going to do."

Rev. W. J. Thomas says safety harbor is the quietest place. "We've been here for years and haven't any rain over there."

ANNOUNCING

THE OPENING AT PAHOKEE OF THE LARGEST AND MOST COMPLETE WAREHOUSE STOCK OF GROWERS AND SHIPPERS SUPPLIES IN THIS SECTION OF THE EVERGLADES

Faith is the basic foundation of this new venture—faith in the future of the Everglades—faith in the citizens of the community and our appreciation of the support of the growers in the section which our new warehouse will serve.

Our Canal Point warehouse will continue to serve our good friends in that section, with the same stock, quality and prices as our Pahokee

warehouse.

Our combined purchases for the two warehouses gives us stronger buying power, which will reflect itself in savings to our customers around the lake.

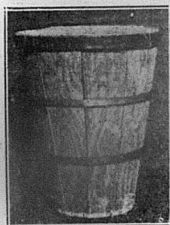

We solicit the support of every grower and shipper, large and small, around the lake.

Our solicitations are based on the fact that we are a home concern. Our growth or earnings will reflect itself by enhancing the value of your property, inasmuch as your dollars are kept at home. Again expressing our sincere appreciation for your past support, and inviting you to participate in the facilities that our new venture offers.

Manatee Crate Co.

Manufacturers of the Famous
RAINBOW BEAN HAMPER
AND OTHER VEGETABLE PACKAGES
